PowerCone[®]

A turbine retrofit that
unlocks wind power's
true potential

An aerial photograph of a wind farm. In the foreground, a large white wind turbine tower is visible, with a crane mounted on top. A large white blade is being lowered from the crane, suspended by a metal frame. The background shows several other wind turbines scattered across a vast, green landscape with some autumn-colored trees. The sky is blue with light, wispy clouds.
